

COYOTES ARE ACTIVE IN THE AREA!

Coyotes in populated places are typically less fearful of people. They have been known to attack pets and approach people too closely. Please read these tips and share with your family and neighbors.

If a Coyote Approaches You:

- Do not run or turn your back
- Be as big and loud as possible
- Wave your arms and throw objects
- Face the Coyote and back away slowly
- If attacked, fight back

Protect Your Pets:

- Keep pets on a short leash
- Use extra caution dusk through dawn
- Avoid known or potential den sites and thick vegetation
- Do not allow dogs to interact with Coyotes

**IN AN EMERGENCY
CALL 911**

Be Prepared:

- Walk with a walking stick
- Keep a deterrent spray handy (pepper spray, vinegar/water spray bottle, bear spray, etc.)
- Carry noise makers or rocks to throw (air horns, whistles, etc.)

Remove Food and Water Resources:

- Never leave or store pet food outside.
- Tightly secure garbage, recycling and don't put out until collection day
- Pick up any fruit laying on the ground
